

BOOST YOUR SERVICE'S RESUSCITATION CAPABILITIES

OUTCOMES WORKSHOP

Critical cases in EMS require quick thinking, using the latest technology to track vital signs for a complete picture of the patient's condition. The one-day Outcomes Workshop can help you and your team sharpen your skills, so you are better prepared for the next emergency.

The no-cost, 8-hour Outcomes Workshop focusses on high-quality CPR, advanced monitoring, and ventilation within ambulance services currently using ZOLL® X Series®, X Series Advanced, or ZOLL AED 3® monitor/defibrillators.

Objectives

- Address the clinical definitions and current science of high-quality compressions and ventilation and learn why they are crucial for survival from cardiac arrest.
- Maximise clinical utility of your ZOLL equipment to manage different disease states in your everyday job: best practices, tips, tricks, and techniques to achieve improved outcomes.
- Participate in resuscitation simulations that focus on specific skill levels.
- Learn how RescueNet® CaseReview software can give you the knowledge needed to provide valuable quantitative and qualitative feedback to your crews in hot and cold debriefing, and discover how it can improve your training.

This program is provided at no cost. For more information about the Outcomes Workshop, contact your ZOLL representative.

- The course will be conducted by ZOLL's Clinical Support Team.
- The Clinical Support Specialists are ALS/PALS-trained clinicians (Paramedics, RNs, or RTs) with extensive experience running debriefing trainings and workshops.
- Course content includes:
 - Science of CPR
 - Future Advances in Resuscitation
 - 'Pit Crew' or 'Human Factors'
- Putting it all together — Scenarios
 - Data CQI: The Value of Data & Debriefing /CaseReview Overview
 - Other Customised Content
